Inventor: Stephen G. Argenbright, Dallas, TX;

A method of creating a trust over a computer network, comprising the steps of:  
receiving, over the computer network, an electronic request to create a trust from a grantor, the request including identification information regarding the grantor, a trustee, and a beneficiary of the trust;  
receiving, over the computer network, authorization to electronically convey funds to an educational account within a trust;  
then storing, in a trust account database and associated with the trust account, information regarding the grantor, the beneficiary and the conveyed funds;  
receiving a response from the trustee, over the computer network,  
comprising confirmation that the trustee accepts trustee responsibilities for the trust;  
electronically establishing an educational account naming the beneficiary as the beneficiary of the educational account;

## Voluntary Results Feedback Form

➤ I am an examiner in Workgroup:  Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature  
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

**Comments:**

PRODUCT NAMES: Account Aggregators (842401)

TITLE: Account Aggregation: Shaping Up Portfolios: CPAs are providing...  
AUTHOR: Lombardo, Carly  
SOURCE: Accounting Technology, v18 n7 p34(5) Aug 2002  
ISSN: 1068-6452  
HOMEPAGE: <http://www.electronicaccountant.com>

RECORD TYPE: Review  
REVIEW TYPE: Product Analysis  
GRADE: Product Analysis, No Rating

Some CPA clients request a one-stop experience. CPAs use account aggregation tools to allow clients to integrate both financial and nonfinancial data in one place. One CPA firm gives its clients a view into their holdings through a Web portal. Many investors may have a managed brokerage account, **online** brokerage account, retirement account, and **trust account**, many of which may be maintained at different financial institutions. It is therefore difficult to achieve a unified view of an investor's portfolio. Account aggregation solves this problem and allows CPAs to make more informed decisions and offer better financial advice. A study by Forrester, however, says that account aggregation in banking has seen disappointing results. However, financial services providers say that when aggregation services are offered by professional advisors, they are more successful. This allows advisors to bring more assets under management. Several companies have added consolidation services to their portals.

Debtmaster is a powerful PC-based debt collection solution. It collects all types of unsecured, third-party debts including bad checks. A colorful windows environment includes an easy-to-use Collector Window, pop-up Work Schedule, and extensive **online** help. Collectors record payment plans and

comments directly on-screen. Other features include automatic account advancing; electronic account placement; promised payment tracking; broken promise tracking; **trust accounting**; credit bureau reporting; and detailed audit reports. Debmaster's document editor and powerful report writer help in **creating** and customizing forms, notices, and reports. The system supports mail return processing, sales and collector commission reporting, varying collection rates, direct payments precollection, and automatic letter series. A full general ledger system with accounts payable and receivable is included. IRS 1099s can be produced on paper or diskette. All functions are integrated into one complete, easy-to-use system for single-entry efficiency and extraordinary flexibility. The package equalizes the playing field for smaller collection agencies allowing for a streamlined system without costly hardware and support services.

CLS/SUMMIT from Computer Law Systems is an integrated, **Internet** -ready solution that offers a complete suite of legal software that helps them save time, reduce liability exposure, and improve allocation of resources. The system rests a centralized entity **database** that integrates all of the user's productivity tools, whether from CLS or another vendor. Law firms can manage all their data, from clients, matters, and vendors to projects, dockets, and documents, using one centralized **database**. CLS/SUMMIT includes case/matter management, financial management, and administrative applications. The case matter management components include CLS Case Manager, which tracks all clients and matters, organizing cases into phases and tasks; CLS Conflict Checking System, which identifies potential conflicts; and CLS Docket/Calendar, which offers a convenient schedule of important engagements. Financial management features include CLS Time and Billing, a complete financial management system that provides timekeeping, billing, accounts receivable, and tailored reports; CLS Accounts Payable helps manage cash and control expenses. CLS General Ledger provides a complete financial picture with financial controls and management reporting. CLS Collections helps improve returns from delinquent accounts, and CLS **Trust Accounting** tracks fees and expenses received in advance and funds held in trust for third parties. CLS/SUMMIT's Budget module compares actual information versus budget. CLS/SUMMIT's administrative applications include CLS Archive Management, which stores statements/reports **online** for quick viewing, printing, or resending; CLS Executive Inquiry System, which allows firms to tailor reports for on-screen viewing, printing, or exporting; CLS File Management to track physical and electronic files from setup through dormancy; CLS Marketing Manager to make marketing efforts easier and more effective; and CLS Time Tracker, an individually tailored screen that quickly captures time. The CLS/SUMMIT application integrates with **Internet** applications, which means that outside counsel and other remote users can access the system at their sites. In addition, CLS/SUMMIT is available through an application service provider (ASP) model and now integrates with Wireless Verticals' MobileTimeBilling (TM), a time and expense system for mobile environments.

CONTACT: Sales Department

SoftPro's SoftPro SQL provides title, escrow/closing, and **trust accounting** features. The system supports multiple local and remote users. It allows orders to be opened over the **Internet**, through virtual private networks (VPNs). Tapping SoftPro SQL, branch offices can search for and open orders located at other offices. Local branch order files can be stored on servers. When order files are edited, management tables containing file location information are updated on the main SQL server. If main servers are unavailable, edited files are queued for later update processes. SoftPro SQL allows users to define the location of order files, **databases**, lookup tables, and documents. The Softpro Administrator provides administrators with centralized user access controls.
